PENNY · CREATE

Content Studio

Everything we make, from idea to published: Build With Me videos, Trail Kits, articles, social posts and newsletters. Content Items and Topics live in Salesforce. Each item in production gets its own Case, and the volunteer is the Case's Volunteer Assigned Contact.

ⓘ Design preview: a sample of real Content Items from Salesforce, Nov 7, 2026. Assignments marked Sample are made up.

What needs a person

Worked out from the data each time the board opens.

⚠ **8 items in production have no volunteer**
Pick a Contact on each one. Trail OS creates the Case.

⚠ **8 publications still say Scheduled**
Their planned dates passed between February and April. Confirm each went out, or reschedule.

⚠ **None of the 13 items in production has a due date**
The Foundations Trail videos need dates before January cohorts start.

⚠ **4 items share a title with another item**
The Transition Trails Story and FT-W01-B each appear twice. Keep one of each.

PENNY Coach

You have two Week 1 videos that build on each other. Which one will you record first?

Answer Penny

How an item moves

1. Start work when you begin.
2. Add the link to your draft or recording.
3. Send it for review. Staff approve and publish.

Stuck, or need something that isn't on your list?

Message the content coordinator

CONTENT STUDIO · VIDEO PRODUCTION

Build With Me: Foundations Trail 2027

Arnav records each build in the Trailhead Pantry Dallas org, then runs the Penny video skill in his own Claude app. Trail OS never calls Claude: each station turns done when the skill fills the matching Content Item field.

Viewing as **Arnav** | Angela

ⓘ Design preview. The 37 FT27 videos are real Content Items (all Not Started today). Progress on the first five is sample data to show each station.

RECORDED	SCRIPTS TO APPROVE	FINAL REVIEWS	PUBLISHED

Viewing as Arnav | Angela

2 of 10 stations done · Next: Penny script and written guide

1 Build plan

Staff · ✓ Done

Foundations Trail 2027, Week 1 (Trailhead Pantry Dallas): set the company information, locale and fiscal year in the org.

From the Content Item Summary. The step-by-step build plan lives on the item's Case.

2 Record the build

Arnav · fills Raw Recording Location · ✓ Done

- Record in the Trailhead Pantry Dallas org, using your Transition Trails Chrome profile.
- Talk through what you're doing. Penny replaces your voice later, so don't worry about wording.
- Keep personal accounts, other email addresses and password tools off screen.

3 Claude step 1 of 5: script and written guide

Arnav in Claude · one session · Now

Claude turns your recording into Penny's script, writes the guide and files both in the item's Drive folder.

- ○ **Drive folder** · fills Content Location
- ○ **Penny script doc** · fills Penny Narration Location, Penny Script
- ○ **Ready for Angela** · fills Penny Script Status = In Review

Prompt for Claude

```
[object Object]
```

Copy prompt →

Paste it in your Claude app. When Claude finishes, this station turns done on its own, because the board reads the fields Claude fills.

4 Approve the script

Angela · sets Penny Script Status = Approved · Later

Read the Penny script and written guide in the Drive folder. Approving lets Arnav generate audio, which spends ElevenLabs credits.

5 Claude step 2 of 5: Penny audio

Arnav in Claude · one session · Later

Claude estimates the ElevenLabs credits and waits for your go before generating. The audio stays in the ElevenLabs flow, so the next step can pick it up in a new session.

- ○ **Penny audio, all scenes** · fills Penny Narration Script Hash
- ○ **ElevenLabs flow link** · fills Content Details

6 Claude step 3 of 5: thumbnail

Arnav in Claude · one session · Later

Claude fills the How To Training Canva template. It's also the first scene of the video.

- ○ **Canva title slide and thumbnail** · fills Thumbnail Design Location

7 Claude step 4 of 5: video and Descript

Arnav in Claude · one session · Later

Claude cuts your recording to Penny's narration, joins the scenes and saves the final in Descript, so nothing is lost when the session ends.

- ○ **Final video in Descript** · fills Descript Project URL
- ○ **Length and scene start times** · fills Length, Content Details

The record

Status	In Progress
Case	Sample Case for CI0157
Volunteer	Arnav Shah (sample)

PENNY Coach

Each Claude step picks up from the record, so you can stop after any of them. Which step will you finish today?

History

1. Build plan ready
2. Arnav linked the raw recording

8 Claude step 5 of 5: Trail OS article draft

Later

Arnav in Claude · one session

Claude writes the learner-task article with a step for each scene, timed to the video, and marks the item ready for Angela.

- ○ **Learner-task article draft** · fills Trail OS
- ○ **Ready for Angela** · fills Status = Ready for Review

9 Final review

Later

Angela · sets Status = Ready to Publish

Watch the final in Descript and read the article draft in Trail OS, then check each item.

10 Publish on YouTube

Later

Angela · creates the Content Item Publication

Publish from Descript, then paste the link. Trail OS records the YouTube publication and marks the item Published.
